

# A Mobile App for your Fire Department

At TheFireDepartmentApp.com, we know that your department is constantly thinking about better ways to keep your citizens safe and informed. We also know that a mobile app is the best way to ensure those citizens are getting the information you know they need.

We're on a mission to become the app developer of choice for fire departments throughout the U.S.

## Why invest in a mobile app?

**77% of the population has a smartphone, and 90% of the time spent on those smartphones is done within an app, rather than a browser.**

Your fire department app is more than simply a way to promote your department. A mobile app is a way to educate and communicate with citizens like never before.

Your app can boast:

- Chief's Welcome
- Fire Safety Checklist
- Burn Permit
- Social Media
- Photo Gallery
- Contact Us
- Alerts
- Push Notifications
- Emergency Contacts
- FAQs
